

KNOWLEDGE MANAGEMENT & INFORMATION EXCHANGE

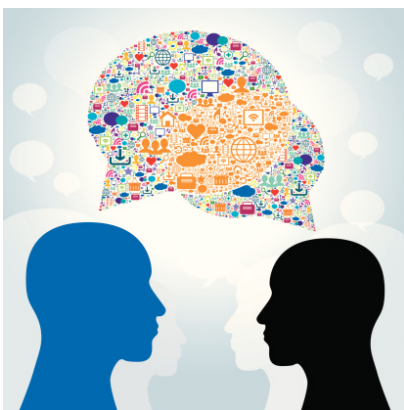

Ingenicomm provides a comprehensive range of knowledge management and information exchange services for government agencies, commercial ventures, and non-governmental organizations. Ingenicomm's services span the full spectrum of knowledge management solutions, and include information exchange facilitation as well as Ingenicomm-provided training and instruction.

Knowledge Management Solutions

As a leading provider of integrated information management systems, Ingenicomm is uniquely qualified to design, implement, and deliver high-performance knowledge management solutions. Ingenicomm's expertise in database architecture, data distribution and replication, cloud technologies, and user interface design enables Ingenicomm to build customized solutions that can meet a variety of information collection, storage, and dissemination requirements, ranging from specialized real-time information sharing tools for mission teams to multi-site, agency-wide knowledge repositories that provide on-demand data access for thousands of users. Ingenicomm offers users of knowledge management solutions a variety of options for disseminating information, including on-demand web-based data retrieval systems, scheduled and on-demand webinars, and specialized systems for tracking and control of sensitive information.

Information Exchange Support

Case Study: PIKES

Under the PIKES program, Ingenicomm facilitates nearly 100 knowledge sharing events per year, providing a full range of event coordination, travel planning, and logistics support services to a diverse array of NASA stakeholders and partners.

Ingenicomm offers a full range of planning and coordination services for information exchange events, including conferences, colloquiums, symposiums, workshops, and technical meetings.

Ingenicomm's support services include the full spectrum of event logistics, including site selection, negotiation, and coordination; travel and logistics support for individuals, teams, and agencies; development of registration websites; and on-site meeting support and facilitation.

Ingenicomm's rich experience with publishing and graphical design enables us to provide a range of materials for information exchange events, including both technical materials (such as application notes, datasheets, brochures, and conference proceedings) and non-technical materials (such as event agendas, speaker invitations, calls for papers, and mailings).

Case Study: CCSDS

As a key industry partner of the Consultative Committee for Space Data Systems, Ingenicomm provides training on CCSDS interoperability standards to space agencies and mission integrators across the US (including at GSFC, WFF, WSC, and KSC) and around the world.

Training Services

Ingenicomm provides generalized and agency-specific technical training solutions, ranging from system-specific operations and maintenance (O&M) training to general training on industry best practices, technical standards, and agency interoperability. Ingenicomm's training solutions can accommodate a variety of requirements, from brief seminars to multi-day training courses, and audiences ranging from one-on-one training for individuals to entire facilities and agencies. Ingenicomm's training expertise includes both domestic and international training; selected customers include NASA, NOAA, the Department of Defense, and a range of international agencies including JAXA, CNES, NSPO, and EUMETSAT.

Ingenicomm, Inc. is a leading provider of ground equipment and enterprise engineering and support services for civil and commercial aerospace programs, as well as the defense and intelligence communities.
